**DETAILED ACTION**

***Allowable Subject Matter***

Claims 2-7, 9-12, 14, and 15 are allowed.

***Examiner's Reasons for Allowance***

Independent claims 2, 9, and 14 are directed to a detailed system for implementing a connection controller. Certain limitations expressly and materially limit the scope of the claim. For example, the claim recited that the know terminal resides in either one of a packet-switched network domain and a circuit-switched network domain. Therefore, the terminal would not be able to reside in both domains according to the express language of the claims.

The closest prior art of record is U.S. Patent NO. 6,400,804 ("Bilder") as applied in the last Office action. Bilder discloses all within the subject independent claims except utilizing information indicative of the domain in which the known terminal resides in selecting the audio source suitable to provide the audio information desired by the user. Rather, Bilder fails to contemplate this claimed feature. See the applicant's arguments, set forth on page 10, first paragraph for further details.

The remaining prior art of record fails to teach or fairly suggest the obviousness of substantially modifying Bilder in a manner not contemplated by Bilder in order to arrive at the invention as expressly claimed in detail and limited by the applicant.

Art Unit: 2645

Regarding independent claims 3, 10, 12, and 15, see pages 4 and 5 of the last Office, mailed on November 17, 2004 for further details regarding the examiner's reasons for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
